

Courses Provided

Safety Leadership

A two day customizable program that is a culture builder. Included in this program are modules on behaviour profiling, communication, Risk management, interventions, hazard assessment and safety meetings.

Behavior Based Safety

Everything from how to build a program your workers will want to be a part of to how to make doing observations easy to do.

Hazard Identification, Assessment & Risk Control Training

- Job Hazard Assessment & Critical Task Analysis
 - This program goes over different levels of hazard assessments, and how to make each one effective
- Accident/Incident Investigation
 - Have your team trained on the process and importance of investigating incidents. Get your team bought into being an active part of incident investigation. To learning from an incident, to make costly incidents stop repeating, and even happening in the first place.

* Client Specific Orientation Training

We will build an orientation to suit your needs
